

Name of Institute: Institute of Technology and Engineering
Name of Faculty: Dr.K. Santhy

Course code: MT0705

Course name: Selection of Materials and Failure Analysis

Pre-requisites: Plastic deformation of Metals

Credit points: 4

Offered Semester: 7th Semester

Course Coordinator (weeks 01-15)

Full name: Dr.K. Santhy

Department with sitting location: Physical Metallurgy Lab (lab 3 in ground floor)

Telephone: 9787710922

Email: santhyk.mt@indusuni.ac.in

Consultation times: 4.15-5.00PM

Course Lecturer (weeks 01 - 15)

Full name: Dr.K. Santhy

Department with sitting location: Physical Metallurgy Lab (lab 3 in ground floor)

Telephone: 9787710922

Email: santhyk.mt@indusuni.ac.in

Consultation times: 4.15-5.00PM

Students will be contacted throughout the Session via Mail / phone with important information relating to this Course.

Course Objectives

By participating in and understanding all facets of this Course a student will:

- 1) To understand various factor involved in product design
- 2) To impart broad knowledge of Metallurgical aspects of engineering in materials selection & technology practices to support design, application, installation, manufacturing, operation and maintenance for successful careers in Academics/ Research & industry that meet the needs of Society and multinational companies.
- 3) To understand various failure mechanisms for engineering materials.

Course Outcomes (CO)

- 1) To develop basic scientific principles and engineering fundamentals necessary for material selection for a product developments.
- 2) To apply the concept of manufacturing in product design
- 3) To analyze and apply their understanding in order to perform failure analysis of various engineering materials and components.

Course Outline

(Key in topics to be dealt)
 Selection of Materials
 Role of mechanical properties in material selection
 Ashby Diagram
 Failure analysis
 Fracture Mechanism
 Fatigue Failure
 Corrosion Failure

Method of delivery

Interactive lectures, Power point presentation, Case studies, Problem solving

Study time

5 classes per week

CO-PO Mapping (PO: Program Outcomes)

Co 1: PO 1, 2, 3, 4

Co 2: PO 1, 2, 3, 5

Co 3: PO 1, 2, 3, 4

Blooms Taxonomy and Knowledge retention (For reference)

(Blooms taxonomy has been given for reference)

Figure 1: Blooms Taxonomy

Figure 2: Knowledge retention

Graduate Qualities and Capabilities covered
 (Qualities graduates harness crediting this Course)

General Graduate Qualities	Specific Department of <u>under</u> Graduate Capabilities
Informed Have a sound knowledge of an area of study or profession and understand its current issues, locally and internationally. Know how to apply this knowledge. Understand how an area of study has developed and how it relates to other areas.	1 Professional knowledge, grounding & awareness
Independent learners Engage with new ideas and ways of thinking and critically analyze issues. Seek to extend knowledge through ongoing research, enquiry and reflection. Find and evaluate information, using a variety of sources and technologies. Acknowledge the work and ideas of others.	2 Information literacy, gathering & processing
Problem solvers Take on challenges and opportunities. Apply creative, logical and critical thinking skills to respond effectively. Make and implement decisions. Be flexible, thorough, innovative and aim for high standards.	4 Problem solving skills
Effective communicators Articulate ideas and convey them effectively using a range of media. Work collaboratively and engage with people in different settings. Recognize how culture can shape communication.	5 Written communication
	6 Oral communication
	7 Teamwork
Responsible Understand how decisions can affect others and make ethically informed choices. Appreciate and respect diversity. Act with integrity as part of local, national, global and professional communities.	10 Sustainability, societal & environmental impact

Practical work:

(Mention what practical work this Course involves)

Lecture/tutorial times

(Give lecture times in the format below)

Example:			
Lecture	Monday	2.00 – 03.00 pm	Google Meet
Lecture	Tuesday	3.10 – 04.10 pm	Google Meet
Lecture	Thursday	12.20 – 1.20 pm	Google Meet
Tutorial	Friday	2.00 – 03.00 am	Google Meet

Attendance Requirements

The University norms states that it is the responsibility of students to attend all lectures, tutorials, seminars and practical work as stipulated in the Course outline. Minimum attendance requirement as per university norms is compulsory for being eligible for mid and end semester examinations.

Details of referencing system to be used in written work

Text books

- 1) F. A. A. Cranes and J. A. Charles, “Selection and Use of Engineering Materials”, Butterworth-Heinemann, 3rd Edition, 1989, ISBN: 9780750615495.
- 2) M. F. Ashby and D. R. H. Jones, “Engineering Materials – Vol. 1”, Butterworth-Heinemann, 4th Edition, 2011, ISBN: 9780080966656.
- 3) H. J. Sharp, “Engineering Materials-Selection and Value Analysis”, Heywood Books-Elsevier, 1st Edition, 1966, ASIN: B0000CMZQ9.
- 4) V. J. Colangelo and F. A. Heiser, “Analysis of Metallurgical Failures”, Wiley-Interscience, 2nd Edition, 1987, ISBN: 9780471891680.

- 4) G. T. Murray and M. Dekker, “Handbook of Materials Selection for Engineering Applications”, CRC Press, 1st Edition, 1997, ISBN: 9780824799106.

ASSESSMENT GUIDELINES

Your final course mark will be calculated from the following:

Example:	
CIE	60 %
Mid Semester Exam	40%
Attendance	05%
Presentation	05%
Assignment (Min. 2)	10%
ESE	40 %

SUPPLEMENTARY ASSESSMENT

Students who receive an overall mark less than 40% in mid semester or end semester will be considered for supplementary assessment in the respective components (i.e mid semester or end semester) of semester concerned. Students must make themselves available during the supplementary examination period to take up the respective components (mid semester or end semester) and need to obtain the required minimum 40% marks to clear the concerned components.

Practical Work Report/Laboratory Report:

A report on the practical work is due the subsequent week after completion of the class by each group.

Late Work

Late assignments will not be accepted without supporting documentation. Late submission of the reports will result in a deduction of 10% of the maximum mark per calendar day

Format

All assignments must be presented in a neat, legible format with all information sources correctly referenced. **Assignment material handed in throughout the session that is not neat and legible will not be marked and will be returned to the student.**

Retention of Written Work

Written assessment work will be retained by the Course coordinator/lecturer for two weeks after marking to be collected by the students.

University and Faculty Policies

Students should make themselves aware of the University and/or Faculty Policies regarding plagiarism, special consideration, supplementary examinations and other educational issues and student matters.

Plagiarism - Plagiarism is not acceptable and may result in the imposition of severe penalties. Plagiarism is the use of another person's work, or idea, as if it is his or her own - if you have any doubts at all on what constitutes plagiarism, please consult your Course coordinator or lecturer. Plagiarism will be penalized severely.

***Do not copy the work of other students.
Do not share your work with other students (except where required for a group
activity or assessment)***

Course schedule(subject to change)

(Mention quiz, assignment submission, breaksetcas well in the table under the Teaching Learning Activity Column)

Week #	Topic & contents	CO Addressed	Teaching Learning Activity (TLA)
Weeks 1	Importance of failure analysis and its relationship to material selection, fundamental causes of failure, general practice in failure analysis.	1	Interactive teaching using PPT
Weeks 2	Failure- types and characteristics: Identification and characterization of ductile and brittle type of failures.	1,2	Interactive teaching using PPT
Week 3	Fracture mechanism, fracture modes and micro fractographic features	1,2	Interactive teaching using PPT.
Week 4	Identification and characterization of fatigue failures, types of fatigue, corrosion fatigue and contact fatigue, etc.	1,2	Interactive teaching using PPT
Week 5	Corrosion and corrosion related failures such as hydrogen embrittlement, stress corrosion cracking and high temperature failures.	1,2	Interactive teaching using PPT
Week 6	In-process failures: Case studies, Service failures: Case studies.	3,5	Interactive teaching using PPT and video. Seminar & Quiz I
Week 7	Philosophy of material selection, motivation for selection, relationship to available resources, concept of resource base.	1,2	Interactive teaching using PPT
Week 8	Criteria for selection of engineering materials – service requirements, ease of manufacturing, availability of materials and cost effectiveness.	1,2	Interactive teaching using PPT
Week 9	Selection for mechanical properties like strength, toughness, stiffness, fatigue, creep and temperature resistance.	1,2	Interactive teaching using PPT and video
Week 10	Selection for surface durability like corrosion resistance, wear resistance. Relationship between material	1,2	Interactive teaching using PPT and block

	Differential Calculus & Matrix Algebra	Engineering	Engineering	Elements of Electrical Engineering
Week 11	Identification of required properties. Selection of materials based on available property data and optimization to select the best material.		3,4	Interactive teaching using PPT and video
Week 12	Case studies in material selection like materials for bearings, gears, automobile structures, aircraft components, ship structures, etc.		3,4	Interactive teaching using PPT and video. Quiz II
